

Rennie's Rose Red Poodles

One of the things we feed our dogs is a special mixture made using moistened dry kibble*. It is especially important for the very small ones, as well as pregnant or lactating females. We use this as a supplement to readily available dry dog food* and lots of water that the dog can go to whenever it wants.

Ingredients:

2 cups dry kibble* (Eukanuba - Small Breed Puppy*)
Hot water, enough to cover the kibble
1/2 pound ground beef, browned and crumbled
1 egg
1/2-cup cottage cheese
1 tbsp Karo Syrup

Place 2 cups kibble in pan and add only as much water as needed to cover all the kibble.

Brown and crumble the ground beef until fully cooked.

Crack the egg into the ground beef and scramble together.

Add fully cooked ground beef/egg mixture and the cottage cheese and syrup to the moistened kibble.

Mix thoroughly.

Store in airtight container and store in refrigerator.

Serve as needed.

*As far as dry food is concerned, we seem to have had the best results with Eukanuba -Small Breed Puppy.
